

MOHD AYAZ QURESHI

Software Engineer — Frontend & AI Product Development

Mumbai, India | +91 9987040243 | ayaz17895@gmail.com | linkedin.com/in/mohd-ayaz-qureshi

Professional Summary

Software Engineer with 5+ years of experience building production applications across fintech and logistics, with strong expertise in React.js, Next.js, TypeScript, and JavaScript. Hands-on experience designing and shipping full-stack AI products, including a deployed multi-agent LLM system using LangGraph, RAG, FastAPI, and ChromaDB. Comfortable building both AI/backend orchestration and user-facing product experiences, with experience in system architecture, API integration, performance optimization, and CI/CD.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, React Context API, HTML5, CSS3, Tailwind CSS, Bootstrap

AI & LLM: LangGraph, RAG, LLM Applications, AI Agents, Tool Calling, Agent Orchestration, Vector Search, Hugging Face Embeddings, ChromaDB, FastAPI, Tavily

Backend: Python, Node.js, REST APIs, SQL, Express.js, MySQL

Tools & Platforms: Docker, Git, GitHub, Stripe, Figma, CI/CD

PROFESSIONAL EXPERIENCE

Senior Software Engineer

iBrandNow (iPayOn - Parent Company), London, UK | Jan 2024 – Jun 2026

- Built and scaled fintech and logistics applications, contributing to end-to-end development of shipment booking, tracking, and payment workflows using **React.js, Next.js, TypeScript, and Node.js**
- Integrated **Stripe and DHL APIs** with JWT-based authentication and robust error handling for secure payment and logistics workflows
- Improved application performance by **30–35%** through code splitting, lazy loading, bundle optimization, and asynchronous data handling
- Collaborated with backend and product teams to define **REST API contracts, system boundaries, and integration standards** across payment and shipment workflows
- Led code reviews and mentored junior developers, establishing **reusable component patterns and engineering standards** that reduced recurring defects

Senior Frontend Developer

Noesis Tech, Mumbai, India | Jun 2021 – Oct 2023

- Led frontend development across multiple client applications, designing **reusable component architecture** that reduced bundle size by ~20%
- Collaborated directly with clients and product stakeholders to translate business requirements into **scalable technical solutions**
- Integrated REST APIs and authentication workflows, establishing reliable **frontend-backend communication**
- Developed reusable component libraries and documented integration standards, improving **maintainability and developer onboarding**

Web Developer Intern

T.Y Travels, Mumbai, India | Sep 2019 – Dec 2019

- Developed and maintained websites using **HTML, CSS, JavaScript, and WordPress**, supporting backend data updates and cross-browser compatibility
- Assisted with website maintenance, content updates, and troubleshooting to ensure day-to-day reliability

PROJECTS

Multi-Agent XAUUSD (Gold) Trading Assistant

Next.js · FastAPI · LangChain · LangGraph · RAG · ChromaDB · Hugging Face Embeddings · Groq · Tavily · Docker · Vercel · Render

- Designed and shipped a **full-stack AI product** combining a Next.js frontend and FastAPI backend with a multi-agent LangGraph system, delivering agent-synthesized market analysis for XAUUSD trade research
- Built a **chat-style Next.js interface** for interacting with specialized AI agents covering technical analysis, market context, and risk analysis
- Engineered a **RAG pipeline** using Hugging Face embeddings and ChromaDB to retrieve domain-specific trading knowledge and provide relevant context to LLM-powered responses
- Integrated external tools for **live gold-price data and financial news retrieval**, combining real-time market information with retrieved domain knowledge
- Implemented modular backend architecture for **API routing, agent orchestration, RAG, tool integration, and data processing**, then containerized and deployed the backend using **Docker and Render** and the frontend using **Vercel**, with environment-based configuration and production logging

DHLpoint Dashboard & Automation System

React · Context API · Node.js · DHL APIs · Stripe

- Built a dashboard for courier bookings, shipment tracking, and retailer onboarding, integrating logistics APIs and automating operational workflows

EDUCATION

Bachelor of Engineering — Computer Science

Rizvi College of Engineering, Mumbai

Graduated Jun 2021 | CGPI: 7.88
